# William Schneider

willschneider15@gmail.com | github.com/willschneider15 | Portfolio Site: wschneider.info

## EDUCATION

**The Ohio State University**, College of Engineering, Columbus OH
**B.S. Computer Science**, Graduated: *May 2023*

## EXPERIENCE

**Cardinal Health | Cloud Engineer** *July 2023 - Current*

- Advanced a critical certificate automation initiative by developing and deploying custom .NET extensions to integrate Keyfactor with GCP to prepare for certificate validity shortening to 47 days.
- Built a novel summarization tool using VertexAI that prompts for human review of low-confidence transcriptions from video meetings, significantly boosting final summary accuracy.
- Strengthened security posture by authoring scripts to audit logs, identifying and removing non-compliant IAM roles from production and SOX-regulated projects.
- Authored a dynamic Terraform configuration to govern GenAI model usage, setting quotas to zero to enforce standards and prevent unnecessary costs.
- Resolved critical Kubernetes pod restart loops caused by app resource misconfigurations, restoring service performance and stability.
- Led four skill-up sessions, educating colleagues on Kubernetes, CI/CD, and Google Logs Explorer.
- Developed and maintained service mesh policies, including ingress and egress rules for the VPC network, enhancing network security and control.
- Coordinated the company-wide migration to Artifact Registry, a process which involved testing in sandbox environments and detailing all required steps for app teams to follow.
- Played a key role in the initial response to the CloudStrike outage by restoring critical GCP VMs from snapshots and training others to accelerate the recovery, saving the company millions.

**Exxaverse | Software Engineer** *December 2021 - December 2022*

- Developed and deployed a Next.js web app for minting in-game NFTs on NEAR blockchain.
- Executed a product launch that produced $75,000 in revenue from non-fungible token sales.
- Architected a serverless system that supported over a million concurrent requests on launch.
- Secured $500k in VC funding through technical presentations to analysts.

**NearLinker | Product Manager** *May 2022 - August 2022*

- Designed and oversaw delivery of an open-source Unreal Engine plugin to interface with the Near blockchain, completing the project within the two-month grant proposal timeline.
- Redesigned and updated documentation based on community feedback for the project.

## PROJECTS

- **Assessment Now:** Delivered a HIPAA compliant local AI assessment tool using Tauri and Go.
- **SaaS Template:** Open-sourced with dev/prod ready GitOps CI/CD pipelines, Stripe, and Firebase.
- **GPTBlogs:** NextJS web app using OpenAI to assist bloggers in writing and publishing faster.
- **Image Runner:** Flask program that uses Google OCR to execute a given picture of code.
- **Blendr:** React Native mobile app to help build relationships between co-workers.
- **Peer Evaluation Tool:** Ruby on Rails web app to evaluate team members and presentations.

## SKILLS AND CERTIFICATES

- JavaScript, Python, Java, Go, C, x86 Assembly, Swift, Bash, Ruby, Node.js, HTML, CSS, Terraform
- Lean/Agile, Next.js, React, SpriteKit, Kubernetes, Docker, MongoDB, SQL, AWS, GCP, Azure, Git
- **Google Cloud Certified - Cloud Digital Leader**
